NodeJS	NodeJS, handlebars
Web	HTML, CSS, Javascript, Jquery, VueJS
Database	MySQL, MongoDB, Firestore
Ops	Docker
Others	Linux, Shell scriptting, Python, C, SQL

Current job

Since 09/2022 I work in a state company called CIID S.E. (https://www.ciidse.ar/) , which belongs to the provincial government of Santiago del Estero – Argentina.

I work as Systems Manager, being in charge of software projects related to generate interoperability in the different public departments of the state and private entities.

I have a team in charge that I have to manage, monitor, mentor, and watch over their work and professional growth.

Having projects related to the State/Government, I could say that the projects in which I work have a considerable political interest, since the projects consist fundamentally in systematizing bureaucratic processes of the government through the use of technology and software.

Although I am not in a full-time software developer position, I always organize the time and space necessary to be able to program mission-critical software on the projects we take on with the team.

Latest job

From 03/2019 until 08/2022 I worked as a senior PHP developer at Tradebyte GmbH (Zalando), located in Germany.

I worked at the core of the product, created in pure plain PHP, some of things we did were for example:

- SQL queries optimization
- Integration with external services like Amazon S3 and SES
- Code and framework develop and refactor
- Code optimization
- Managed to migrate from PHP 5 to PHP 7, and initiated the process to migrate to PHP 8.
- All code was done with TDD and BDD
- etc.

Was also part of my daily tasks to:
- Do code reviews of the work done my colleges
- On board new team members
- Participated in projects (what I mean is didn't do just development, but I was also involve in the decisions about what to do and how)

I do have a recommendation letter from the company, describing my participation there with more details.

Previous jobs

As a small reference about my previous jobs and techs, here I add a list:

CIID S.E.	Argentina	System Manager – Senior Developer	09/2022	Today
Tradebyte GmbH (Zalando Group) www.tradebyte.com/en/	Germany	Senior PHP Developer	03/2019	08/2022
Macamedia www.macamedia.com.ar	Argentina	Lead/PHP Developer	10/2016	01/2019
vixenIT (not existing anymore)	Argentina	Lead/PHP Developer	05/2014	10/2016
Freelance	Argentina	PHP Developer	06/2013	03/2014
Telecom Personal www.personal.com.ar	Argentina	Software Analyst/Developer	08/2011	03/2013
Hewlett-Packard	Argentina	Unix Administrator	12/2010	09/2011
CePSI - Hospital	Argentina	ERP - Software Developer	12/2009	12/2010

Is my intention not to overload this CV with information, that is why I am open to have a more extensive talk about my current and previous jobs.

More details can be found in my website **http://juan-morales.github.io**
